.net framework version 4 instructions

Our Mid-Year Release for Micropay Professional and Micropay Professional Lite is due for release at the end of August, a requirement of this release is that you must be on the latest version of the .net framework version 4.

Please make sure you have your IT department run through this install as soon as possible, this needs to be installed before you run this update.

In order to run this, you will need to be on a minimum OS of Windows XP Service Pack 3.

1. You can download this from this link <http://www.microsoft.com/download/en/details.aspx?id=17851> and save to your desktop.

2. Double click on the 'dotNetFx40...' Icon on your desktop to run.

- Microsoft .NET Framework 4 Setup will then start to install (this may take some time, do not crash out).

- When it is finished installing it will prompt you to click 'Finish'.
